Bargaining Update

No. 4

Board of Supervisors does not believe you deserve a raise!

Today we gave our economic proposals to management which included a proposal comparable to what the Board of Supervisor's gave themselves in 2013. In the afternoon, management came back to the table with an offer of a 1 year contract with no increases to salary or benefits.

It became very clear that the Board of Supervisors does not believe we deserve a raise or increases to benefits. How do they plan to keep quality public services unless they're willing to invest?

Contact your Supervisor today and ask them: *Were you elected to put yourself first or to put your Community First?*

"The elected leaders of our community gave themselves 3 raises but don't think their constituents deserve a living wage. Are they there to invest in themselves or to invest in our community?"

-Linda Castillo, Emergency
